SIGNATURE NAIL SYSTEM

The Signature Nail System uses dipping powder that creates a lighter, more natural covering for weak or soft nails. Within weeks of using the signature nail system, your nails will be stronger and healthier. Because SNS dipping powder does not bond to your nails, it helps to fortify calcium and vitamin E on your nail bed, creating stronger nails without the chemicals, drilling, and filing. This option is perfect for you if you love french manicures and a more natural look.
